Safety Components

Power/mation is dedicated to providing a complete range of machine safety products that meet and exceed our customers' safety requirements.

The Power/mation Solutions Group provides the most important piece to the Power/mation safety solutions offering – custom fencing. We are proud to house the fencing workshop in our very own Pewaukee, Wisconsin office location.

Our safety solutions are then completed by having access to a variety of automation safety components from the industry's most trusted suppliers. Let our trained sales staff assess your application and select the right components to complete your safety solution.

ABB JOKAB SAFETY

Custom Fencing

By partnering with ABB Jokab Safety, custom fencing is now stocked, designed, quoted, processed and distributed by Power/mation. We offer two systems: Express and Standard. Both consist of a minimum number of components including anodized aluminum profile posts with floor brackets, ABB Jokab Safety patented mounting hardware, U-profiles and welded mesh or polycarbonate panels.

The Power/mation Solutions Group will customize a high quality perimeter fencing system that meets your requirements while providing a system that is robust, durable and attractive. There are virtually no limitations to what we can build while still retaining a straightforward process.

Design

Contact your Power/mation sales representative for a safety consultation to determine the best system for your application. We can utilize your existing CAD drawing or you can work with your Power/mation representative to conceptualize your design.

Quote

The Power/mation Solutions Group analyzes your layout and designs your fencing system utilizing ABB Jokab Safety SafeCAD software, aiming to minimize waste and ease customer assembly. The revision process continues until you are completely satisfied with the design.

Build

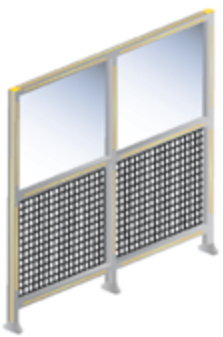

Aluminum extrusions are precisely cut to your system design requirements. Floor brackets are fastened to the fence posts prior to shipment on our Express Systems, allowing a rapid install. Power/mation has made extensive investments in people and tooling to offer industry-leading turnaround.

Delivery

The fencing hardware, large-format assembly drawings and all other safety components needed to assemble your system are neatly packed in crates to further ease installation. Finally, units are securely shipped with a distinctive, tamper-evident wrap.

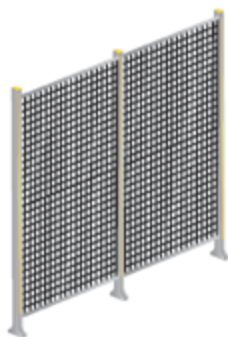

Ease of Assembly

To simplify the installation process, the assembly of the system uses everyday tools. The panels and extrusions are pre-cut and labeled, matching the provided assembly drawings. Necessary mounting brackets integrate the patented ABB Jokab Safety T-Lock technology, allowing a hassle-free install while reducing labor and engineering costs.

Standard System

- Strongest offering
- Most configurations
- T-Lock mounting system

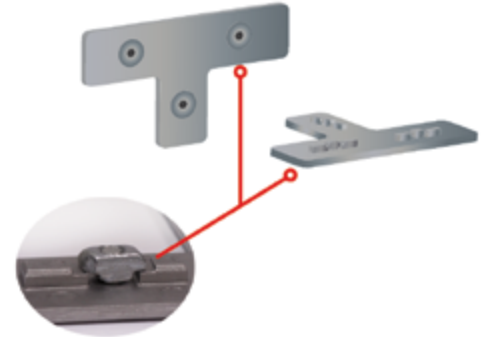

Express System

- Easiest to install
- Lowest cost
- Low-profile netlocks

Standard Tools

- 6mm Hex Key
- 5mm Hex Key
- T25 Torx Bit

One Step Assembly

- ABB Jokab Safety patented T-Lock mounting system
