Custom Enclosure Modification

Gone are the days of meticulously preparing enclosures by hand. With CNC capability now in-house, the Power/mation Solutions Group has slashed lead times considerably. The use of modern CAD programming allows for intricate and accurate panel modifications, from low volume applications to standardizing multiple panels for an OEM.

The cutting-edge machinery gives us the ability to cut, drill and tap nearly any material including steel, stainless steel, aluminum and non-metallics. The Perforex CNC system was designed to harmonize with Power/mation's entire enclosure offering and we are pleased to pass the advantage to you.

The Power/mation Solutions Group workshop is located in St. Paul, Minnesota at our corporate headquarters. To tour the space and see the extent of our capabilities, contact your local Power/mation Sales Representative.

Kits & Assemblies

The Power/mation Solutions Group offers a broad portfolio of services beyond enclosure cutting to ease your workflow. Our team manages everything from large-scale enclosure assembly to small-scale custom cordset production. Each kit or custom assembly is designated with a unique part number to ease the ordering and receipt process for our customers. Examples of custom offerings include:

- Din Rail Assemblies
- Cable Assemblies
- Graphic Overlays
- Built-to-Order Kits
- Bus Bar Assemblies
- Mounting Assemblies
- Large Scale Assemblies
- Custom Marking

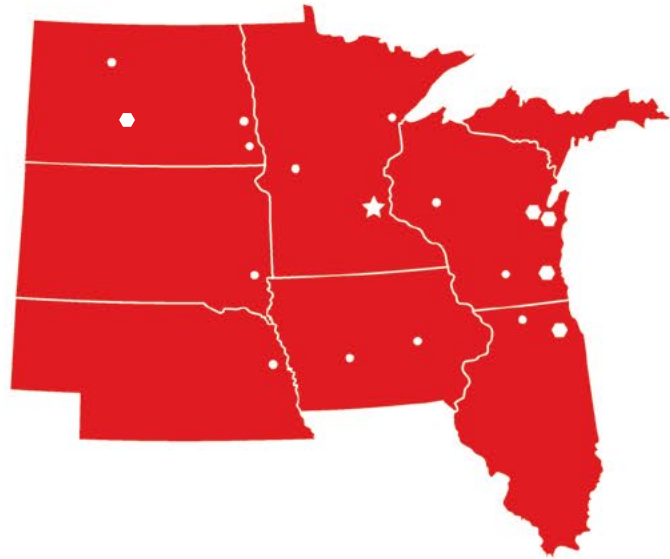

Power/mation Vendor Partnership

Power/mation has access to a multitude of industry-leading product lines to best suit your next custom enclosure or assembly solution. Our well-established vendor relationships give our customers confidence in knowing that products are in stock and ready to ship with competitive pricing.
